DO YOU WANT TO BUILD A SNOWMAN? (FROZEN)

UKE TAB BY *DISNEY*

```
C
Do you want to build a snowman?
                     G
Come on let's go and play
                 Am
I never see you anymore
     F
Come out the door,
                      G
It's like you've gone away
                    Am
We used to be best buddies
    C
And now we're not
  Am             E       F
I wish you would tell me why
                       C
Do you want to build a snowman?
                        F
It doesn't have to be a Snowman

Young Elsa: Go away, Anna
                     C
Toddler Anna: Okay, bye

                          C
Do you wanna build a snowman?
                                G
Or ride our bike around the halls
                            Am
I think some company is overdue
                F                                  G
I've started talking to the pictures on the walls
   Am
It gets a little lonely
                    C
All these empty rooms
         Am         E         F
Just watching the hours tick by

                           C
Please, I know you're in there
                                G
People are asking where you've been
```

```
                                      Am
They say have courage, and I'm trying to
                          F                G
I'm right out here for you, just let me in
               Am
We only have each other
            C
It's just you and me
Am             E    F
What are we gonna do?
                          C
Do you wanna build a snowman?
```
